

## ► Mobile Road System

### ■ MRS - Super Heavy

#### ► Properties

- Easy and quick to transport (forklift)
- Suitable as a construction road, work area, parking lot or turning area
- Good traction thanks to the special MRS surface design
- Safe access for vehicles and people
- Can be laid immediately - no ground preparation required
- Avoids severe ruts and damage
- Flexible, robust, hard-wearing, long service life
- Low risk of theft compared to aluminum and steel mats

**Material:** polyethylene, high molecular weight

**Dimensions:** 4000 x 2000 x 38 mm (incl. Profil)

**Overlap edge:** 150 mm

**Weight per panel:** approx.. 304 kg

**Surface / colour:** 3.0 mm & roughened profile / black-coloured

**Load capacity:** approx. 260 t (depending on the ground conditions)

**Transport per truck:** 60 units (427 m<sup>2</sup>)

Gas and oil

Wind power construction

Transmission

Road construction and access routes

Mobile crane working spaces

Heavy load transports

Concerts and events

Helipads

▮ The **ultimate heavy duty mat**. With its dimensions of 4 x 2 m, it offers the ideal conditions for the heavy load industry in the areas of line construction, wind farms and other heavy load transports of all kinds. The **MRS - Super Heavy** also enables the use of special vehicles, e.g. with extra width, in open terrain. The innovative, overlapping connection system provides the highest level of **stability** and **resilience**.
